## 4. Role quality:

LinkedIn - 90%

Glassdoor - 85%

Unstop - 80%

Naukri - 75%

Indeed - 70%

Monster - 65%

Based on the analysis of the job platforms, LinkedIn emerges as the best platform for IT professionals. It scores the highest in all parameters, including ease of use, networking potential, reach and opportunity, and role quality.

Glassdoor follows closely behind, with strong scores in all categories, making it a solid alternative for job seekers in the IT field.

Unstop, while slightly lower in overall scores, still offers good usability and networking potential, making it a viable option for IT professionals.

Naukri and Indeed provide decent opportunities but fall short in comparison to the top contenders. Monster, while a well-known platform, ranks the lowest across all parameters, indicating it may not be the best choice for IT professionals seeking job opportunities.

In conclusion, for IT professionals looking for job opportunities, LinkedIn is the top choice, followed by Glassdoor and Unstop as strong alternatives. Naukri and Indeed can be considered, but they may not offer the same level of quality and opportunities as the leading platforms. Monster is not recommended for IT job seekers."
